

Earth Day Every Day

To make Earth Day every day

We have to put the trash away

If we recycle we can make the same difference

As we do with trees we should plant kindness throughout the world

To make Earth Day every day

We have to lose pollution today

And let the smog not blur the way

So we can see how to make the world clean

To make Earth Day every day

We have to make it go away

More bikes, less cars

More produce, less junk
